IPS Cable Simulation has become the leading tool in its field providing functionality for the entire process from concept and design through assembly and production planning to after-sales.

With the 5th IPS Cable Simulation Conference 2023, we will revive the tradition to meet in person and strengthen the international network of experts applying the cable simulation technology.

Many users of IPS Cable Simulation from all over the world have already seized the opportunity to join in our conferences to learn more about the making of the software, new features and to share their own experiences with users from different domains and different countries.
